

TRINOVA ACCOUNTING & ADVISORY

TRANSFER POLICY

Capsule Corp — Controlled Transfer & Authorization Record

Policy basis: Prepared from the supplied Capsule Corp accounting/statutory record dated 23 September 2026.

Scope limitation: The supplied source does not contain details of intercompany transactions, transfer-pricing methods, related-party arrangements, transfer amounts, or tax authority agreements. Accordingly, this document establishes a controlled transfer-policy framework without inventing transaction-specific facts or tax positions.

1. Purpose

The purpose of this policy is to establish a documented control process for transfers associated with Capsule Corp's accounting and statutory records. Transfers should be identifiable, authorized, supported by underlying documentation, and traceable through the accounting record.

2. Transfer Authorization

No material transfer should be treated as approved solely because a document has been electronically signed. The responsible authorized person should confirm the transfer purpose, amount, parties, supporting documentation, accounting treatment, and required approval before the transfer is recorded or represented as complete.

3. Supporting Documentation

Each transfer record should retain, as applicable: the transfer request or instruction; identification of the parties; date and amount; business/accounting purpose; relevant invoice, agreement, schedule, or reconciliation; approval evidence; and evidence of completion.

4. Accounting & Reconciliation Controls

Transfers should be reconciled to the relevant accounting records and supporting schedules. Any discrepancy should be investigated and documented before the record is treated as reconciled. Changes after approval should be documented as controlled revisions and should not silently overwrite the original record.

5. Tax / Transfer-Pricing Review

Where a transfer involves related parties or has potential tax consequences, the responsible accounting/tax reviewer should determine whether separate transfer-pricing or tax documentation is required. The supplied Capsule Corp source does not identify a transfer-pricing method, related-party transaction, or applicable tax treatment; therefore none is asserted in this policy.

6. Digital Execution & Record Integrity

Control	Policy Requirement
Authorization	Record the authorized approver and approval date/time.
Evidence	Retain documents supporting the transfer and its accounting treatment.
Reconciliation	Reconcile the transfer to the relevant accounting records/schedules.
Revision control	Create a new controlled version for substantive post-approval changes.
Execution evidence	Retain the executed document and associated verification evidence where applicable.

7. Transfer Record Template

Field	To Be Completed
Transfer Reference	_____
Transfer Date	_____
Transferor / Sending Party	_____
Transferee / Receiving Party	_____
Amount / Currency	_____
Purpose / Description	_____
Supporting Document(s)	_____
Accounting Treatment	_____
Tax / Transfer-Pricing Review Required?	Yes / No / To be determined
Authorized Approver	_____
Approval Date	_____
Completion / Reconciliation Evidence	_____

8. Source-Based Status

The source record identifies Capsule Corp, reference TRN-1C5174B2, dated 23 September 2026. It records the draft financial accounts and balance sheet as completed/verified, the CT600 assessment as drafted/awaiting sign-off, director remuneration and payroll as reconciled/verified, and statutory filing authorization as pending/requiring signature. This transfer policy does not change those source statuses.

Document control: This policy is an internal controlled-policy template derived from the supplied record. It should be reviewed by the responsible accountant/tax adviser before being adopted as a formal statutory or tax policy.
